From: Bob Porter, Airport Manager

Terminal Building and Terminal Apron Construction

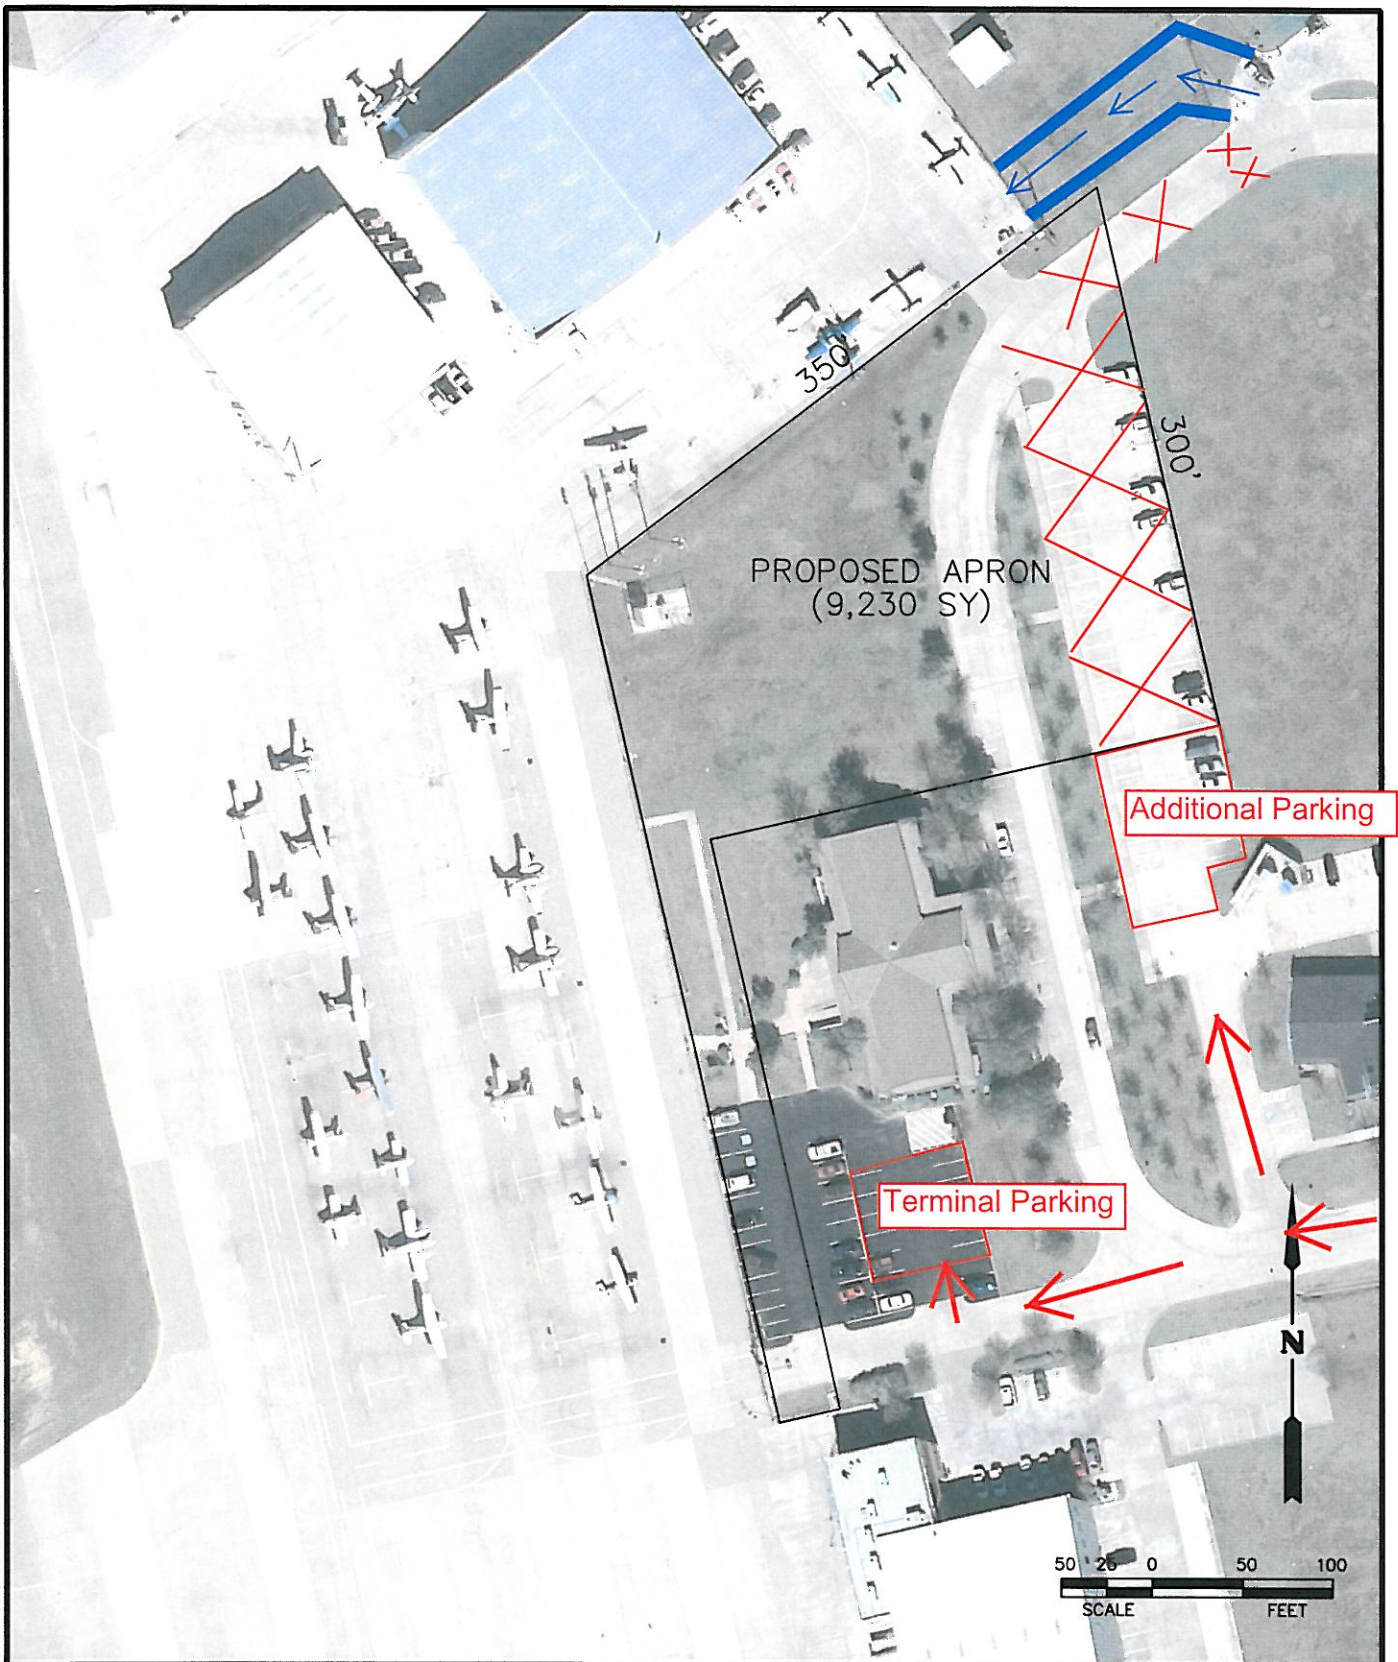

Beginning Monday, February 22, 2010 construction will begin on the terminal apron expansion. Shortly thereafter, construction will also begin on the new airport terminal building.

- *Vehicular traffic to the north businesses will be slightly diverted; however, access will be available throughout the project.*
- Access to the airport terminal building will be routed through the access drive, immediately south of the fire station and north of Harrison Aviation. Parking for the terminal building will be restricted to the east lot and south lot as shown on the attached map.

We will post future updates on our website: <http://www.arlingtontx.gov/aviation>. Your patience and continued support of improvements to the airport is appreciated.
